Education

Georgetown University (2023-2026)
M.S. in Computational Linguistics
GPA: 4.0

Dartmouth College (2017-2021)
B.A. in Computer Science. Minor in Linguistics
GPA: 3.74, Cum Laude

Employment

Johns Hopkins University Applied Physics Laboratory (2021- Present)
NLP Researcher

- Created NLP tools that extract critical information from text for USG analysts.
- Awarded 8 grants to pursue research interests in AI trustworthiness, summarization, entity disambiguation, adversarial AI, LLM domain adaptation, and multimodal anomaly detection.
- Led small research teams of 3-6 people, presented results to internal and external stakeholders
- 8 IP disclosures for original technology. 8 awards for leadership and innovation.

DALI Lab (2019 – 2021)
Software Engineer

- Produced full-stack web and mobile applications every 10 weeks.
- Created and ran classes on web design and development
- Sat on core executive board as a developer and Women in Science Program lead.

Alarm.com (2020)
Software Engineer Intern

- Created client-facing automated reports to provide information to property managers about all devices in their units.

Cambly Inc.(2020)
Software Engineer Intern

- Enhanced Android application to include ESL courses for adults.

Dartmouth College CS Department (2018)
Teacher's Assistant

- Graded homework and tests for OOP course, taught a weekly review class to 10-15 students.

Camp Nicolet for Girls (2017-2018)
Counselor

- Organized and led daily activities for children aged 7-16 for 10 weeks.

Featured Research Projects

Investigating the Cross-Lingual Transferability of NLP Tasks: Evaluate the success of cross-lingual transfer of different NLP task types as language distance increases. (Master's Capstone Research Paper)
Task Arithmetic with Support Languages for Low-Resource ASR: Incorporate information from genetically related high resource languages to bolster performance on low resource ASR models. [System Paper]
Forget-Me-Not: Use task arithmetic to prevent catastrophic forgetting after LLM domain adaptation.
CaTE: Report on methods for data curation for trustworthy AI development. [Full Report] [Paper on domain knowledge elicitation]
